

EnviroPro

Company Profile

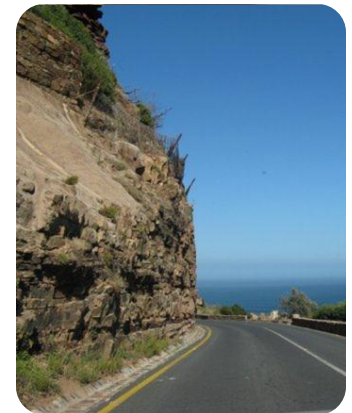

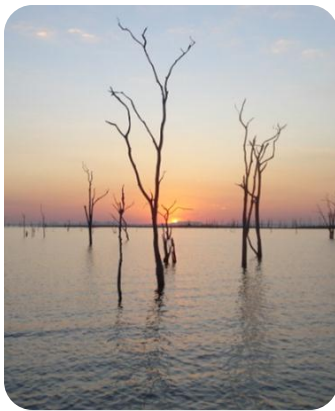

Integrity. Passion. Excellence.

introduction

EnviroPro is a vibrant and energetic consultancy setting the benchmark for professionalism and report quality in the field of environmental impact assessment and environmental management.

Every project is managed and run by one of the company directors assuring all stakeholders of individual and specialised attention from experienced and dedicated professionals. Our business ethos is one of passion, integrity and excellence in everything that we do.

By establishing synergistic relationships with like minded and dynamic individuals, we are now also able to offer the expertise of an accredited green building professional and a GIS specialist.

- Basic Assessment Processes
- Scoping & Environmental Impact Assessment Processes
- Environmental Management Programs
- Environmental Officer and Environmental Control Officer services for construction
- Environmental compliance auditing
- Post Construction Audits
- Environmental Feasibility Reports
- Developing ISO 14001:2004 compliant Environmental Management Systems (EMS)
- Environmental Management auditing
- Environmental Legal Compliance & Environmental Due Diligence
- Environmental Management Training
- Green building accreditation
- GIS and mapping

areas of expertise

- Infrastructure incl. roads, causeways, bridges, stormwater, sewage & water reticulation.
- Up market & subsidised housing developments.
- Waste handling facilities & transfer stations.
- Electrical distribution (powerlines, substations).
- Gas pipelines & metering stations.
- Petrol Filling Stations.
- Above & underground tank installations.
- Industrial developments & upgrades for paint, chemical, glass & paper manufacturing industries.
- Retail centre, commercial & mixed used development.
- Coastal infrastructure including pier reconstruction, stormwater infrastructure & coastal defence structures.

managing members

Josette Oberholzer holds a Master of Science degree and has 9 years experience working in the field of environmental impact assessment. She is also certified as an Environmental Assessment Practitioner with the Interim Certification Board for Environmental Assessment Practitioners of South Africa (EAPSA).

Iain Jourdan holds an Honours degree in Geographical Sciences and Environmental Management and has 5 years experience in the field of Environmental Impact Assessment. Iain also has a year's worth of construction experience which has given him unique insight into the challenges faced when balancing the needs of the environment versus those of development.

Both Iain and Josette are experienced and familiar with running both Basic Assessment and Scoping & EIA applications and between them have managed several hundred projects from start to finish. The range of projects they have worked on covers green fields developments including up market residential housing, filling station applications, commercial and warehousing developments as well as subsidised housing developments. They are also experienced in handling industrial projects at varying levels of complexity.

managing members

Joseette has extensive environmental legal knowledge regarding not only the EIA process and requirements but also with regards all other legislation at a national, provincial and local level and how these affect environmental management issues.

Joseette has implemented ISO 14001 Environmental Management Systems for a number of industries and has a solid understanding of good environmental practice in an industrial setting. This experience has proven useful in the assessment of industrial applications allowing her to bring a more balanced understanding of industrial processes and impacts.

She has compiled environmental legal registers for chemical and paint producers, for companies in the medical and general waste sectors, for water service providers and for development companies. She has also conducted a number of environmental legal audits in these sectors and is therefore conversant with a wide range of legislation relating to various aspects of industry, environment and development.

Joseette is certified as an Environmental Assessment Practitioner with the Interim Certification Board for Environmental Assessment Practitioners of South Africa (EAPSA).

managing members

Iain Jourdan

Iain has extensive experience with the EIA process in both green field developments (residential and commercial properties) as well as infrastructure projects ranging from roads and bridges to large scale water reticulation schemes. Iain is also well versed in line development EIAs including gas pipeline, sewer and water reticulation and electrical distribution with many years experience working on gas pipeline applications within KZN and Gauteng.

He is well versed in the management and auditing of these projects where pipeline lengths can vary from a few hundred meters to many kilometres. He has also spent a great deal of time working on rural road infrastructure projects to establish access into deep rural areas and is conversant with the intricacies of working within areas governed by traditional authorities.

Iain has experience working within the coastal zone and has a coastal geomorphology background. His experience in working with infrastructure coupled with his knowledge of the process has proven invaluable in assisting local municipalities and government departments in completing multiple large scale projects within the set timeframes. These projects have included large scale vehicle and pedestrian bridges, stormwater, water and sewer reticulation and road infrastructure. He has operated extensively within KwaZulu Natal, the Eastern Cape and Gauteng.

team members

Chevy has a BSoc Sci Hons degree in environmental management and is currently acquiring a masters degree at the university of Cape Town , part time. Chevy has worked in the environmental field conducting Basic Assessments and Scoping and EIAs for the last three years. He is well versed in managing rural infrastructure projects as well as more complex greenfields developments in sensitive areas. He is also an experienced environmental auditor (ECO), having worked on large scale developments such as the new Airport.

Infrastructure and line Development Projects: We have logged hundreds of hours in the assessment of line developments including road, bridge and stormwater infrastructure, sewerage and water reticulation, gas pipeline and electrical distribution lines falling within both deep rural and urban environments.

Industrial, Commercial and Residential developments: Having worked extensively on various industrial applications as well as on the implementation and assessment of ISO 14001 environmental Management Systems we are well versed in assessing industrial applications. We have assessed applications for the chemical and paint sectors, are familiar with requirements for general and medical waste facilities and recyclers and are conversant with the processes involved in paper, glass and packaging production. We are also familiar with green fields developments having worked on various commercial, residential and mixed use developments and are able to offer sound advice on sustainable development practices and managing and protecting sensitive systems on site. We have also worked on numerous subsidised housing projects within the eThekweni area and are familiar with the environmental process in relation to the establishment of cemeteries. We are well versed in the strict requirements for public participation and can assure the smooth and efficient running of these processes. We are now also able to offer expertise on the field of green buildings.

Ecological knowledge and work within coastal areas: We have a sound grounding in the assessment of impacts within the terrestrial, fresh water and estuarine environments and have the ability to manage and understand complex and sensitive EIAs with respect to sensitive systems and coastal processes.
